

SANDWICH / PANINI GRILL

These heavy duty Panini Grill with its two sided cooking plate will heat up your menu items in half the time and sealing in all the flavours. Panini-presses often produce distinctive parallel grill marks on the sandwich and are able to accommodate breads of varying lengths, unlike other hinged sandwich toasters which require a standard size of sliced bread. Some models have extra large cooking surface of 340x230mm to bake up to 5 panini at once.

The upper plate is self-balancing and the pressure spring is adjustable. Fitted with cast iron plates, it is compact and portable providing flexibility in your operations. Thermostat is adjustable and has an optimum 300°C temperature so that whether it is fresh or frozen steaks, hamburgers, salami, ham, meat or cheese, these will be served piping hot almost immediately to your customers.

Whether you want it in single or double grill plates, with grooves or in flat smooth surface, large or small size, CookMaster today!

SINGLE GRILL PLATE

Model : PNG 290

Dim : 290x305x210

Upper grill size: 214x214mm

Lower grill size: 218x230mm

Heating elements: 2

Power: 1.8kw, 220v

Net Wgt: 14kg

Model : PNG 410

Dim : 410x305x210

Upper grill size: 338x220mm

Lower grill size: 340x230mm

Heating elements: 2
